Rinse aid for dishwashers **START Rinser**

an irreplaceable element for achieving a bright dishwashing result.

- additional shine of glass and other dishes
- absence of stains and water stains
- effective drying of dishes, including plastic ones
- neutralization of detergent residues

Salt for dishwashers START SALT

an important tool for improving the quality of dishwashing (especially in regions with hard water). The composition of the salt, which does not contain technical impurities, ensures optimal functioning of the water softening element of the dishwasher.

- helps prevent the formation of mineral deposits on parts of the dishwasher that come into contact with water, thereby extending the life of the appliance
- it softens the water, which contributes to more effective washing
- the coarse salt fraction dissolves more slowly

Tablets for washing dishes in dishwashers BRIX in dishwashers

multifunctional tool "All in One"

- effectively cleans difficult stains for incredibly clean dishes
- keeps the filter clean of grease deposits
- protects the heating element of the machine from lime scale
- removes plaque from tea and coffee
- includes "2X" water softening function
- includes the rinse aid function
- it is effective at low-temperature modes of eco-cycles
- small convenient packaging with optimal tablet content

Description: Capsules for washing **BRIX & START TM**

The powerful super-concentrate formula removes strong dirt, stains and unpleasant odors, takes care of colors and ensures flawless washing results.

How to use: Put the capsule in the empty drum of the washing machine, load the laundry on top. The capsule is completely soluble in water. Choose the washing program, temperature mode and degree of spin, guided by the information contained on the laundry labels. It is not recommended to use on short (30-40 minutes) washing cycles. Not suitable for hand washing. Do not take with wet hands. Colored linen that sheds - wash separately.

Features: Liquid synthetic detergent in soluble capsules for washing fabrics made of cotton, linen, synthetic and mixed fibers in automatic washing machines.

Advantages:

Due to rapid dissolution in water, the active components of the capsule are instantly mixed and begin to act from the first minutes in the drum of the washing machine.

The unique innovative formula of the composition provides an unparalleled result and acts more effectively than traditional powders and gels.

Full weight - 23.6 g per capsule

Biodegradable at least 80%, does not harm water bodies and is safe for septic tanks.
